- *C. wuellerstorfi* ^{18}O record in -1 (Winn et al., 1991), in -2 (Brassel et al., 1985).
- *G. sacculifer* ^{18}O record in -1 and -2 (Vogelsang, 1985; Brassel et al., 1985). *G. ruber* (white) ^{18}O record in -1 and -2 (Winn et al., 1991; Sarnthein et al., 1994; Brassel et al., 1985).
- ^{14}C ages of carbonate coarse fraction in -1 (Vogelsang, 1985).
- AMS ^{14}C analogue stratigraphy.

Core fit:

- 0 cm in core -1 = 0 cm in core -2, based on *G. sacculifer* and *G. ruber* ^{18}O records (see also Pflaumann, 1986).

Surface sediment age:

- Zero, inferred from undisturbed sediment surface in B.C. -1.
